WELCOME THE LITTLE GIANTS

Grade R

Ms E Zveushe
Grade R A

Mrs G Ramapuputla
Grade R B

Dear Parent

Grade R is the year preceding the learner's formal schooling. It is the most important time for the youngsters at our school. In Grade R they get used to speaking English all the time. They learn in English and so that they can master the language.

Learning becomes fun through singing songs, rhymes, repetition of important words, reading and telling stories. We also learn numeracy, literacy and life skills in the class. We do obstacle courses and go for excursions every term.

The learners are taught how to use different writing and drawing tools and also phonological awareness. We help them develop skills in critical thinking, problem solving, the ability to communicate well, being able to collaborate with others and to develop creative skills.

Grade R learners are involved in sporting activities:

- Athletics,
- Bulletjie Rugby
- KFC Mini Cricket.

Playing is the key to many important learning experiences, as children learn through play, they learn using their senses, repetition and imitation. We prepare our little ones for schooling as well as for life.

Our kids just started their Lego Robotics journey and we would love for you to join us next year in Grade R!!!

Respectfully yours
Ms E Zveushe
Ms G Ramapuputla

Grade R

Hello young boy or girl. Ready to join us in Grade R!

We are so happy to hear that we might be your grade R teacher next year 😊.

In Grade R we learn through play and we have a lot of fun.

Each morning we start with our morning song where we greet each other in a special way.

This is followed by two free play activities like playing with puzzles and building blocks.

The next activity is the morning ring. This is where we do the devotion, register, celebrate birthdays and listen to special news from our friends in grade R.

Every two weeks we learn about a different theme. During theme discussion, we share pictures and discuss our theme in a funny and interesting way.

This is followed by our mathematics guided activities, creative arts, English and science activities. You will love creative arts where we do some painting, modelling drawing and construction of different things. We learn how to read and write sounds. You will start reading words too. In Maths we learn how to count and write numbers correctly.

In grade R, we also have time for music and movement. We learn how to play musical instruments. We also sing and dance to songs. It's a lot of fun and you will love it.

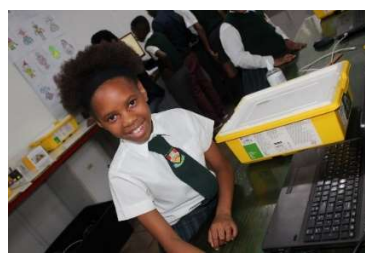

During break time you will play and have fun on the jungle gym and the slides.

After break we do physical education to keep us strong and healthy. After this we have a lot of play time at the play area.

The last thirty minutes of the day is our story time. We listen to interesting stories. If you come to grade R you will be able to write your name, letters and numbers before you go to grade 1.

We also do sports like mini cricket and Bulletjie rugby. Grade R's also go for excursions where you learn many things. Robotics and Lego will be part of every week at SACPS.

We can't wait to meet you!

Your soon to be Teacher.
